Project Title : Meesho Jewellery Marketplace Database

Topic : Database Relationship Analysis using Joins

1.Objectives

1. Combine Customer, Product, Order, and Payment tables.
2. Implement INNER JOIN, LEFT JOIN, and RIGHT JOIN.
3. Retrieve complete order details.
4. Display customer purchase history.
5. Generate multi-table reports.

2.INNER JOIN — Customer and Orders

Customer details and their matching order details will be displayed together.

```
SQL> set linesize 200;
SQL> SELECT
  2      C.CUSTOMER_ID,
  3      C.CUSTOMER_NAME,
  4      O.ORDER_ID,
  5      O.ORDER_DATE,
  6      O.TOTAL_AMOUNT,
  7      O.ORDER_STATUS
  8  FROM CUSTOMER C
  9  INNER JOIN ORDERS O
 10  ON C.CUSTOMER_ID = O.CUSTOMER_ID;

CUSTOMER_ID CUSTOMER_NAME                                      ORDER_ID ORDER_DAT TOTAL_AMOUNT ORDER_STATUS
----------- -------------------------------------------------- ---------- --------- ------------ ------------------
          1 Priya                                                    1001 22-SEP-26         1198 Shipped
          2 Anu                                                      1002 22-SEP-26          999 Packed
          3 Divya                                                    1003 23-SEP-26          599 Shipped
          4 Kaviya                                                   1004 23-SEP-26          449 Delivered
          5 Meena                                                    1005 24-SEP-26          349 Pending
          1 Priya                                                    1006 25-SEP-26          799 Pending

6 rows selected.
```

3.LEFT JOIN — All Customers and Orders

All customers will appear, including customers who have not placed any orders

```
SQL> SELECT
  2      C.CUSTOMER_ID,
  3      C.CUSTOMER_NAME,
  4      O.ORDER_ID,
  5      O.TOTAL_AMOUNT,
  6      O.ORDER_STATUS
  7  FROM CUSTOMER C
  8  LEFT JOIN ORDERS O
  9  ON C.CUSTOMER_ID = O.CUSTOMER_ID;

CUSTOMER_ID CUSTOMER_NAME                                      ORDER_ID TOTAL_AMOUNT ORDER_STATUS
----------- -------------------------------------------------- ---------- ------------ ------------------
          1 Priya                                                    1001         1198 Shipped
          2 Anu                                                      1002          999 Packed
          3 Divya                                                    1003          599 Shipped
          4 Kaviya                                                   1004          449 Delivered
          5 Meena                                                    1005          349 Pending
          1 Priya                                                    1006          799 Pending

6 rows selected.
```

4.RIGHT JOIN — All Orders and Customers

All orders will appear, even if a matching customer record is missing.

```
SQL> SELECT
  2      C.CUSTOMER_ID,
  3      C.CUSTOMER_NAME,
  4      O.ORDER_ID,
  5      O.TOTAL_AMOUNT,
  6      O.ORDER_STATUS
  7  FROM CUSTOMER C
  8  RIGHT JOIN ORDERS O
  9  ON C.CUSTOMER_ID = O.CUSTOMER_ID;

CUSTOMER_ID CUSTOMER_NAME                                          ORDER_ID TOTAL_AMOUNT ORDER_STATUS
----------- -------------------------------------------------- ---------- ------------ --------------------
          1 Priya                                                    1001         1198 Shipped
          1 Priya                                                    1006          799 Pending
          2 Anu                                                      1002          999 Packed
          3 Divya                                                    1003          599 Shipped
          4 Kaviya                                                   1004          449 Delivered
          5 Meena                                                    1005          349 Pending

6 rows selected.
```

5.Customer Purchase History

```
SQL> SELECT
  2      C.CUSTOMER_ID,
